

☑ The various sensors is to be used for detecting the temperature in the forest and early detection of fires.

☑ we merge various sources data like unmanned aerial vehicles and lorawan sensors to do the project

☑ we thinks that we need some a lot of extra knowledge for the project.

☑ Thinks that we have some what good idea about the emerging methods.

☑ Thinks that we need sufficient materials for to do the project.

EMERGING METHODS FOR EARLY DETECTION OF FOREST FIRES

☑ we collect a lot of info-
-mation related to the
Project.

☑ But as per the data collecti-
-the quality of data is not enogh
For us.

☑ We select the perfect tool for this
project after listening the classes and as
per our data knowledge.

☑ It feels not too hard
for understanding the
topic.

☑ But while knowing the
Pratical knowledge of the topic it
Is very difficult.

☑ The project requires a massive data for
understanding and the classes are enough
good for understanding.
